for

RF liquid optical mouse

(MOW-509)

- **Lovely liquid and floater**
- **Creative change operation, Release the trouble of battery**
- **Wireless optical for comfort working**
- **Built-in long life and large power Li-ion battery**

Federal Communications Commission (FCC) Statement

This equipment has been tested. And it found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and uses and radiates radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.**
- Increase the separation between the equipment and receiver.**
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected**
- Consult the dealer or an experienced radio /TV technician for help.**

Warning: A shielded-type power cord is required in order to meet FCC emission limits and also to prevent interference to the nearby radio and television reception. It is essential that only the supplied power cord be used.

Use only shielded cables to connect I/O devices to this equipment.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

WELCOME

Your mouse uses digital radio technology to communicate with your computer

STEP1 Connect the receiver

Note: Turn off your computer before you connect the receiver. It may damage the mouse port of your computer if you plug the receiver into the mouse port when the computer is still running.

1. Make sure that your computer is turned off
2. Connect the receiver to the USB port and make sure the Instruction LED shines

STEP2 Charge the Li-ion battery

The wireless mouse uses built-in Li-ion battery. It is must to charge it in advance for your first use.

1. Pull out the charge cable from the bottom of the receiver.
2. Insert the cable plug into the front jack of the mouse.
3. Make sure the charge LED shines, it shows that the charging is working.

STEP3 Set up your mouse

You can do following steps at the mean time of charging.

1. Press the connect button on the top of the receiver.
2. Press the connect button at the bottom of the mouse.
3. Move the mouse freely to make sure the connection is ok

If the Instruction LED of the receiver is blinking.

4. You can use the product normally when the charging is working.

STEP4 Retract the charge cable.

1. The charge should be lasted for several hours (it is 12 hours for the first time, and it is 3-4 hours from second time).
2. Pull out the plug from the mouse after charge finish.
3. Pull the cable once again and then it can be retracted into the receiver.
4. Pack up the plug in to the receiver.

STEP5 Installation finish

Congratulation! You can use the wireless mouse now!

Charge the mouse

Your mouse use built-in Li-ion chargeable battery. You need to charge the battery after out of the power. Please do step 2 and then do step 4 to finish the charge operation. At the charge time, you can use product normally.

Note:

1. The products cannot work on the highly glossy surfaces and deep dark color surfaces. Such as mirror, glass marble surface. It can work on light color surface. It can work on light color surfaces, such as desktop, computer table surface, and so on.
2. The products will go to sleeping mode when you do not operate the products more than 20 minutes, which can reduce the power consumption. You may press any button of the mouse to wake up it to working status.

Trouble Shooting

Mouse does not work upon installation

Try one or more of the following;

1. For optimal performance, please place the receiver at least eight inches or 20centimeters away from the mouse other electrical devices, such as the computer, the monitor, or external device.

2. Make sure that the battery is not out of power and charge the battery.
3. If you are working on a metallic surface, try using mouse pad for better reception.

The mouse cursor does not move properly

1. Change the position of your radio receiver, because it may be too far from the mouse or the keyboard. Or a large metal object may be interfering with receiver radio reception. Try moving the receiver and/or mouse to improve the reception.
2. The interference may occur from other same products at near distance in office or home, you may change the ID code (see step3) several times in order to get optimal performance..

Note:

The product has 255 Ids. Every product may be defined in different ID code (see step3) in order to avoid the interference from others.
